EXPERIENCE

Independent Contractor, San Jose, CA Jan 2012 to Current

As an independent contractor I work with large corporations, small businesses and individual people to complete web development projects. Since many of these projects start from scratch, I have a choice of which programming languages I wish to use. My aim is to diversify my programming skills and every chance I get I try something new. **Technologies include: PHP, Java, Python, Laravel, Cake PHP, CSS, Angular, Knockout, Ember, JQuery, Javascript, SQL, NoSQL, Linux Command Line, REST APIs**

Olixir Technologies, San Jose, CA Mar 2015 to Current

First task was to make their site responsive according to Google's mobile standards. Other work performed at this company includes using Google Analytics to find patterns in consumer behavior and also researching SEO strategies to reach a targeted user base using organic and AdWords search campaigns. **Technologies include: PHP, HTML, CSS, JQuery, SQL**

Amfasoft Corporation, San Jose, CA Jun 2014 to Jun 2015

Hired as an intern to redesign their website. Employed technologies such as responsive CSS design, adding functionality to their customized CMS, designing the entire UI/UX using Photoshop, constructing a modular system for pages using a mix of object oriented and procedural code sourced by an SQL database. **Technologies include: PHP, HTML, CSS, JQuery, SQL**

S.K 703 Topiary Inc., San Jose, CA Sep 2014 to Current

Performing the online marketing tasks of drafting email campaigns, analyzing Google AdWords, Amazon Advertising, Yahoo Store Analytics information to increase revenue approximately 300% to date. Additionally, opened new stores using Excel data feeds. **Technologies include: HTML, CSS, JQuery, Amazon and Ebay Web Stores**

HiDev Mobile Applications, San Jose, CA

Dec 2012 to Jan 2015

Mastered the use of CMSs like WordPress, Joomla and Drupal. Client projects also involved setting up VPS servers using YUM to install Apache, PHP, MySQL, BIND, and other relevant software on Centos. Projects also utilized social media APIs such as Facebook Open Graph API and Google Client APIs such as Calendar and Maps. **Technologies include: PHP, HTML, CSS, JQuery, SQL, Google Calendar API, Bandwidth API, Linux**
